Crew Van

the solution for work and leisure

By fitting a second seat row with an integrated partition wall it is possible to convert your Sprinter panel van into a Crew Van at all times. The perfect solution for the combined transport of people and material.

The new standard.

The Crew Van complies with the latest European safety standards. All seats are provided with 3-point inertia-reel safety belts as well as both tiltable and height adjustable head restraints.

The partition wall is designed to meet the ISO 27956:2009 standards for load shifting protection.

Also the design plays an important role when developing a Crew Cab. The finely designed partition wall completely separates the load and passenger compartments.
