MANY ADVANTAGES

SIMPLE

We have always been convinced that the best ladder is both short and long. The telescopic ladder is easy to pull out to the desired length and securing it before use is just as easy.

FLEXIBLE

The ladder can be adjusted to the optimal height to fit your needs. It is small and compact for storage and transportation and with the telescopic function the ladders are perfect in small spaces.

QUALITY & SAFETY

The products are certified according to leading norms - EN 131, SP - and more. For more info on Telesteps safety work visit www.telesteps.com

DESIGN

Simple locking system with only two buttons. Wide steps for a safer experience. Use as a leaning ladder or a free standing ladder.

Many ladders in ONE ladder. Genius.

BRAKE TECHNOLOGY BY TELESTEPS

Telesteps developed a sophisticated brake-system to minimize squeezing fingers and for a controlled closing of the ladder. It is not only safe but makes the ladder easier to use at the same time.
