## A NEW ANIMAL

### RESCUE IS ON ITS WAY

The Telesteps Rescue Line is the first telescopic ladder in the world where 3 people can use the ladder at the same time. It is the 2nd generation of telescopic ladders from Telesteps with the revolutionary triangular tube design. This makes the ladders stronger and more torsionally rigid than ever before.

### SIMPLE, SAFE & STRONG

When Telesteps created the Rescue ladder it needed to consider the ever changing environments for rescue personnel worldwide - whether to quickly access windows or roof tops; in cold, warm or harsh conditions where time is of the essence - The Telesteps Rescue Ladder manages all.

The Rescue is certified according to the European norm EN 1147, specifically designed for fire- and rescue, which is one of the hardest certifications to obtain for a telescopic ladder. This means it can handle loads up to **500 kg** or **3 people** using it simultaneously.

### THE UNDISPUTED NO 1 IN THE WORLD

Telesteps has since the beginning of the 90's been creating and developing telescopic ladders, which has benefitted many industries and customers worldwide. With its big range of telescopic work tools, and with presence in over 45 countries, Telesteps is steadily continuing to innovate and pave the way for others to follow.

**Rescue** - where **Your Hero** meets the **Strength** and **Safety**  
by **Telesteps**.

## **RESCUE 4,1 M MILITARY**

Art. no: 70741-501B  
No. of treads: 13  
Tread width: 50 mm  
Working height: 5,0 m  
Length, extended: 4,1 m  
Length, closed: 1,17 m  
Width: 0,47 m  
Weight: 19,2 kg

## **RESCUE 4,1 M FIREFIGHTERS**
